# VISHAL PRAJAPATI

DATA & ANALYTICS PROFESSIONAL

prajapati.n.vishal@gmail.com • +91 8010828284 • Pune, India
linkedin.com/in/vishal-prajapati-8198653b0 • github.com/VPraja92

## PROFESSIONAL SUMMARY

Entry-level Data Analyst with hands-on experience in data validation, reconciliation, cleaning, SQL querying, Excel reporting, and dashboard development. Validated 5,000+ records across 8–10 databases and resolved data discrepancies to support reporting accuracy. Currently completing an Advanced Certification in Data Science & Analytics with IIT Patna and a B.Sc. in Computer Science.

## SKILL HIGHLIGHTS

**Technical Skills**
- SQL
- Tableau
- Microsoft Power BI
- Excel (Advanced Functions)
- Python (Pandas, sqlite3)
- Database Management Systems
- Dashboards & Reporting

**Analytical Skills**
- Data Profiling & Validation
- Data Reconciliation
- Data Cleaning & Preparation
- Exploratory Data Analysis
- Gap & Root-Cause Analysis
- Process & Business-Rule Modeling
- Error Correction & QA

**Soft Skills**
- Stakeholder Coordination
- Translating Business Needs into Reports
- Cross-functional Communication
- Business Acumen
- Report Writing
- Problem Solving

## PROJECTS

**EPL Match Data Database & Analysis** | **Self-directed (Python / SQLite)** *2026*
- Built a SQLite database (epl_2025-26.db) from 2025-26 English Premier League match data using Python's sqlite3, structuring raw data into a queryable schema.
- Applied data cleaning and SQL querying to check data quality and prepare the data for trend identification and reporting.

**Library Management System** | **Nextgen Analytix Internship (Python, MySQL, Streamlit)** *2026*
- Designed a normalized MySQL schema (books, members, book issues) with primary and foreign keys and CHECK constraints, and loaded sample data into all three tables.
- Wrote SQL reports using JOINs, GROUP BY, subqueries, and date functions (overdue books, top 5 most borrowed titles, late returns), and built a Streamlit interface with Python-based transactional CRUD and issue/return logic.

**Clinic Patient Analytics Dashboard** | **Power BI** *2026*
- Built an interactive Power BI dashboard on 4,200+ patient records across 7 departments, combining a KPI card, department and weekday breakdowns, a department-by-weekday matrix, and a daily trend line.
- Found that Thursday is the busiest day (631 patients) and Sunday the quietest (537), and that Neurology and General Physician together account for about 37% of patient volume.
- Modeled patient, doctor/department, and calendar data to enable cross-dimensional reporting and interactive analysis.

**Insurance Claims Analysis Dashboard** | **Power BI (Power Query, DAX)** *2026*
- Built a Power BI dashboard on 10,000 insurance policies and claims, using Power Query cleaning, DAX KPI measures, slicers, and a drill-through page.
- Found that Travel generates the most premium (about 2.5M) and Adults (25–60) account for about 52% of claim value.

**Hospital Operations Dashboard** | **Power BI (Power Query, DAX)** *2026*
- Built a star-schema Power BI dashboard on 2,506 patient records covering admissions, bed occupancy, ER time, revenue, and patient feedback.
- Found an average ER time of 65.6 minutes, longest in the outpatient department (96 minutes).

**Spam Email Classifier** | **Python, TensorFlow / Keras, NLP** *2026*
- Built an end-to-end text classification workflow to label emails as spam or legitimate, covering data cleaning, tokenization, sequence padding, and train/validation/test splitting.
- Trained an LSTM neural network (embedding, LSTM, and dense output layers) and evaluated it with accuracy, precision, recall, F1 score, and a confusion matrix.

**Tata Group Data Analytics (Tata iQ, Financial Services)** | **Forage** *July 2026*
- Ran exploratory data analysis with GenAI tools to assess data quality and flag risk indicators, then proposed a customer-delinquency risk model, moving from a business problem to an analytical recommendation.

## WORK EXPERIENCE

**Intern** | **Nextgen Analytix, Pune** *Sept – Dec 2026*
- Completing a 3-month internship through the Ethans Technical Institute / IIT Patna certification program.
- Built a Bus Reservation System in Python (OOP), turning business rules for booking, scheduling, and seat allocation into structured, working logic.

**Data Steward (Data Quality & Reporting)** | **Durham Workforce Authority, Oshawa, ON** *May 2024 – Aug 2024*
- Validated 5,000+ records across 8–10 databases, correcting about 12 discrepancies per week, and worked with departments to align a weekly Excel report with their needs.

**Landscaping & Food Service Roles** | **Ontario, Canada** *2009 – 2024*

## EDUCATION & CERTIFICATIONS

**Advanced Certification in Data Science and Analytics** | **Ethans Technical Institute with IIT Patna** *Apr 2026 – Present*
**B.Sc. in Computer Science (In Progress)** | **University of the People** *May 2026 – Apr 2027*
**Certifications:** IBM Introduction to Inferential and Descriptive Statistics (May 2026) • IBM Data Analysis with Python (2025) • IBM Data Science Foundations – Level 2 (2025) • HP LIFE Data Science and Analytics (June 2026)
**High School Diploma** | **The American School of Kinshasa** *Aug 2004 – Jun 2009*
